

Act Fast - Side Scroller

Game description:

The main character in the side scroller walks automatically and stops walking when he encounters an obstacle. An obstacle can be removed by successfully completing a minigame or using an 'item'. The game is over when the players fail to remove the obstacle after a certain amount of time.

Everyone that participates in the game will receive an item that can be used to remove certain obstacles. As a player, your item can be seen on your own mobile screen and the items that the other players have can also be seen (but not used) on your own device.

Minigames scale with the amount of people participating. For instance: 8 players need to tap 80 times in 5 seconds or 6 players need to blow in the microphone to complete a mini game.

The sidescroller enters the next level when a certain amount of obstacles have been removed. Higher levels have harder obstacles and the users have less time to complete them.

Setup:

People can scan a QR code at the beginning of the line to download the app. The game will be displayed on large screens.

Devices needed:

- mobiles
- enough screens so the whole queue can watch the progress

Obstacle Examples:

Fire

Can be removed by using the following items:
bucket of water, fire extinguisher
